

HNDIT4242-Computer Services Management

Week 03
Organization & Service Management

Lesson Objectives

- Learn about **organizational structures** in IT service management.
- Understand **service management best practices**.
- Study **customer handling and essential administration** in IT services.

1. Comparative Overview of Organizational Structures

- **Hierarchical Structure:**
 - Traditional setup with clear roles (e.g., IT Manager → Support Staff).
- **Matrix Structure:**
 - Employees report to multiple managers (e.g., project-based teams).
- **Flat Structure:**
 - Minimal levels of management, more autonomy for employees.
- **Example:**
 - **Google** follows a **flat structure**, encouraging innovation and flexibility.

2. Defining and Managing Services

- **Service Level Agreements (SLAs):**
 - Contracts between **service providers and customers**, specifying the expected level of service.
 - Example: **Internet providers guarantee 99.9% uptime** for businesses.
- **IT Service Management (ITSM) Practices:**
 - Includes **incident management, problem management, and change management**.

3. Essential Administration in IT Services

- **Key Tasks:**
 - **Documentation:** Keeping records of service requests.
 - **Resource Allocation:** Assigning IT resources effectively.
 - **Risk Management:** Preventing data loss, cybersecurity threats.
